

PRESBYTERY OF THE CASCADES

SYNOD OF THE PACIFIC • PRESBYTERIAN CHURCH (U.S.A.)

June 30, 2009

Comisión de Desarrollo Sostenible
Camara de Diputados

By Hand Delivery

The Presbytery of the Cascades, representing 121 Presbyterian Congregations in Oregon, Washington and California with 22,726 members, met June 26-27, 2009 in Vancouver, Washington. At this meeting they voted to request that the long-postponed environmental audit be completed without further delay.

The presbytery recently sent a delegation to Bolivia which visited the Kori Kollo mine, learned of their praiseworthy environmental actions, and were assured by mine officials that the mine authorities desire this audit. The delegation then visited the Toma-Toma community, learned of the environmental devastation they have endured, and were told by their leaders that Toma-Toma wants this audit. Finally, the delegation met with the organizations CEPA and CORIDUP, who also are advocating for an impartial audit. We therefore are conveying to you our strong desire for a government-sponsored transparent, honest, and comprehensive ecological audit in order to determine the nature, source, extent and impact of environmental pollution in the Oruro area of Bolivia that our delegation visited.

The Rev. John C. Huenink, Stated Clerk
The Presbytery of the Cascades
